Abstract

This paper analyzes a seminal equation in population biology.

1 Introduction

Hey guys watch this, this'll be really cool

2 Materials & Methods

Here's how it's done, //

A foundational equation of population biology is:

$$\frac{dN}{dt} = rN\left(1 - \frac{N}{K}\right) \tag{1}$$

It was first proposed by Verhulst in 1838 [1].
